

## Email Security-as-a-Service

### Why SaaS?

The benefits of the SaaS model are immediate. No up-front cost, predictable revenue stream, and access to an enterprise class and cost effective Anti Spam and AV protection service that partners can deliver to their customers anywhere in the world.

- Low cost of entry - No capital investment
- No infrastructure headaches
- Minimum technical resource overhead - Low cost of ownership
- Extend your reach – No limits!
- Rapid large scale deployment
- High customer retention rates
- Short Sales cycle

MXSweep's hosted email security-as-a-service ('SaaS') platform delivers world class and cost effective anti-spam and anti-virus security alongside email disaster recovery and content control services. MXSweep provides Managed Service Providers ('MSP's') with a streamlined route into the exploding email SaaS market and shields business customers from all email-borne cyber threats.

### MXSweep Email Services

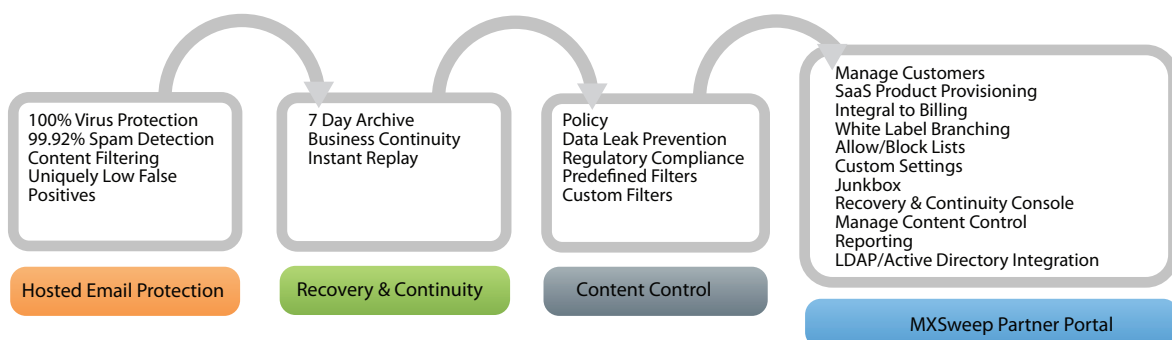

MXSweep currently offers three complementary email services:

- **Email protection:** Combines effective anti-spam, anti-virus and anti-phishing cover with uniquely low false positives.
- **Content control:** Protects against external threats, abuses and the misuse of sensitive or classified information for a secure working environment.
- **Recovery and continuity:** Captures all email in an easy-to-access encrypted archive for instant retrieval – even when the server's down.

Together, these services help end-customers achieve a smoothly working IT infrastructure that drives efficiency and productivity. In addition, our vision is built around our SaaS model and we are committed to enhancing and adding services for our MSP's.

### MXSweep Services Delivery

MXSweep allows the consolidation of email security services into one centrally managed solution through our fully branded partner portal. MXSweep empowers MSPs to rapidly meet customer demand with our effective email security services delivered through the partner portal.
